## EXPERIENCE

### Trinity University 2022–2023

**Visiting Assistant Professor**

- Mentored students extensively in classroom, small-group, and one-on-one environments to ensure knowledge transfer
- **Biochemistry:** Utilized and improved upon flipped-classroom method for better student engagement and greater achievement of learning outcomes
- **Biochemistry Laboratory:** Executed laboratory instruction by training and managing up to twelve students in advanced instrumental techniques
- **Advanced Chemical Principles:** Engaged students in critical thinking exercises designed to ensure accurate and precise chemical measurements

### Georgia Institute of Technology 2017–2022

**Graduate Research Assistant**

- Managed my dissertation project in an efficient and productive manner: completed a demanding Ph.D. with 3 publications in 5 years
- Generated SOP documents for sample prep and method execution for multiple analytical instruments, prioritizing safety and meticulous lab hygiene
- Developed analytical methods for HPLC, LC-MS, Circular Dichroism, and NMR analysis under different temperature, salt, and pH conditions.
- Performed troubleshooting and method development for advanced instruments
- Designed novel experiments, maintained meticulous lab notebook records, and executed a project across multiple institutions involving four senior collaborators

**Graduate Teaching Assistant**

- **Survey of Biochemistry:** Developed content and lectured for a survey course covering the essential suite of undergraduate biochemical topics
- **Quantitative Analysis:** Instructed a quantitative analysis laboratory course including developing and improving submission templating for assessment

### Apple 2015–2017

**Technical Expert**

- Diagnosed technical problems on both mobile (iPhone) and desktop (Mac) platforms while setting expectations and maintaining customer satisfaction
- Engaged in thorough problem-solving utilizing established SOPs, deviating when necessary to address anomalous issues
- Developed expertise in troubleshooting hardware and software issues

### University of Southern California 2012–2014

**Graduate Research Assistant**

- Cultured sulfur-reducing hyperthermophilic bacteria under anaerobic conditions, including utilizing glove-box sterile techniques
- Performed microbial growth experiments in chemostat-style continuous-flow bioreactors under steady-state conditions

**Graduate Teaching Assistant**

- **Climate Change:** Taught a general education course involving delivering scientifically accurate and socially relevant content to students with varying levels of subject competency and background knowledge

### Pomona College 2008–2012

**Undergraduate Researcher**

- Designed primers for, cloned, and expressed a modified GDI (GDP dissociation inhibitor) protein in order to prevent N-terminal acetylation to determine phenotypic result in flies
- Used E. coli as a bacterial engineering platform to express desired protein products and analyzed via Western Blot

### Children's Hospital, Los Angeles 2010

**Research Intern**

- Maintained and performed genotypic analysis via quantitative polymerase chain reaction (PCR) of a mouse model system
- Developed experience in organ removal and sectioning for microscopic analysis

## EDUCATION

**Ph.D.** **Georgia Institute of Technology** **2022**
Chemistry and Biochemistry

**B.A.** **Pomona College** **2012**
Molecular Biology

## AWARDS AND FELLOWSHIPS

**Georgia Institute of Technology:**

Tech to Teaching Certificate 2022

Astrobiology Fellowship 2021

Graduate Certificate in Astrobiology 2021

William Emerson Outstanding Second-Year Seminar Award 2018

**University of Southern California:**

President's Fellowship 2012

**Additional:**

Eagle Scout Award (Boy Scouts of America) 2008
